---

**Results-driven Full Stack Web Developer** with expertise in MERN stack, React, Node.js, and TypeScript. Skilled in building scalable, responsive, and secure web applications with modern UI/UX, authentication, and payment integration. Experienced in delivering high-quality freelance projects, enhancing client workflows, **handling clients professionally, and ensuring seamless communication**. Passionate about solving complex challenges, optimizing performance, and contributing to innovative development teams.

## Technical Skills

---

- **Frontend:** React.js, Next.js, Vue.js, TypeScript, Tailwind CSS, ShadCN UI, Zustand
- **Backend:** Node.js, Express.js, MongoDB, Mongoose, JWT, Zod
- **Tools & Workflow:** Git/GitHub, VS Code, Postman, React Query, ESLint
- **Deployment & Hosting:** Vercel, Netlify, Firebase, Exon Host

## Professional Experience

---

### Freelance Full Stack Developer

*Independent Contractor | Jan 2023 – Present*

- Delivered **5+ responsive web applications** for small businesses, improving workflows and online presence
- Built **secure authentication systems (JWT)** and integrated **Stripe payments**, increasing trust and conversions.
- Worked with **diverse international clients on Fiverr**, consistently meeting deadlines with **100% client satisfaction** and building long-term professional relationships.

### Front End Developer

[Munshi IT](#) | *Dec 2024 – July 2025*

- Developed and maintained **web applications and internal tools**, ensuring high performance and scalability.
- Led a team of developers, **monitoring daily progress, assigning tasks, and providing technical guidance**.
- Collaborated with stakeholders to **plan, prioritize, and deliver projects on time**.
- Implemented **best practices in code quality, version control, and deployment pipelines** to improve efficiency.
- Acted as a bridge between management and the development team, **enhancing communication and workflow**.

## Projects

---

### MyTradesPerson | Online Tradespeople Platform

 [Live](#) |  [GitHub](#)

- Developed a **full-stack platform** that connects customers with local tradespeople (plumbers, electricians, carpenters, etc.) for hiring and collaboration.
- Implemented **profile management, search & filtering, and direct messaging/contact features** to make finding the right professional easy and fast.
- Built an **admin dashboard** for managing users, roles, and service requests.
- Added **secure JWT authentication** and **role-based access control** for customers, tradespeople, and admins.

## BloodConnect | Blood Donation Platform

 [Live](#) |  [GitHub](#)

- Developed a full-stack platform connecting blood donors and recipients, with features for posting, searching, and accepting requests to ensure fast access in emergencies.
- Implemented user profile management and role-based access control (donor, requester, volunteer, admin) for secure and organized interactions.
- Built end-to-end functionality including secure authentication, contact messaging, and admin dashboards, delivering a real-world solution that saves lives.
